| PCE23302   | PROJECT WORK (PHASE I)  |                  |  |  | 0 | 0 | 12         | 6 |
| <b>COURSE OBJECTIVES</b>   |   |                  |  |  |   |   |            |   |
| To enable the students to  |   |                  |  |  |   |   |            |   |
| 1  | apply the fundamental knowledge for understanding state of the art information about any topic relevant to curriculum                                 |                  |  |  |   |   |            |   |
| 2  | identify a specific problem for the current need of the society and collecting information related to the same through detailed review of literatures |                  |  |  |   |   |            |   |
| 3  | develop the methodology to solve the identified problems.   |                  |  |  |   |   |            |   |
| 4  | enhance the presentation and documentation skills in order to disseminate solution to the real world challenging problems.                            |                  |  |  |   |   |            |   |
| The project topic should be selected to ensure the satisfaction need to establish a direct link between education, national development and productivity and reduce the gap between the world of work and the world of study.  |   |                  |  |  |   |   |            |   |
| The student should complete the following for Phase I  |   |                  |  |  |   |   |            |   |
| <ul style="list-style-type: none"> <li>Literature survey and formulate the problem.</li> <li>Develop preliminary design approaches.</li> <li>Implement and verify the project.</li> <li>Prepare a detailed report and presentation.</li> <li>Present findings in reputable journals and international conferences</li> </ul> |   |                  |  |  |   |   |            |   |
| <b>TOTAL PERIODS</b>   |   |                  |  |  |   |   | <b>180</b> |   |
| <b>COURSE OUTCOMES</b>   |   | <b>BT MAPPED</b> |  |  |   |   |            |   |
| At the end of this course, the students will be able to  |   | (Highest Level)  |  |  |   |   |            |   |
| <b>CO1</b>   | identify, analyze, interpret and formulate the problem and conceptualize the methodology of the project in research areas.                            | Applying (K3)    |  |  |   |   |            |   |
| <b>CO2</b>   | create a suitable method from different methodologies and forms of analysis to produce research design.   | Applying (K3)    |  |  |   |   |            |   |
| <b>CO3</b>   | demonstrate the developed /implemented system in the form of hardware and/or software and complement to the society.                                  | Applying (K3)    |  |  |   |   |            |   |
| <b>CO4</b>   | present the technical findings in written report/ product and be able to present the ideas in reputed journals and/or International Conferences.      | Applying (K3)    |  |  |   |   |            |   |

|--|---|-------------------------|-----|-----|-----|-----|------|------------------|----|----|
| <b>COURSE OBJECTIVES</b>   |   |                         |     |     |     |     |      |                  |    |    |
| To enable the students to  |   |                         |     |     |     |     |      |                  |    |    |
| 1  | apply the fundamental knowledge for understanding state of the art information about any topic relevant to curriculum                                 |                         |     |     |     |     |      |                  |    |    |
| 2  | identify a specific problem for the current need of the society and collecting information related to the same through detailed review of literatures |                         |     |     |     |     |      |                  |    |    |
| 3  | develop the methodology to solve the identified problems.   |                         |     |     |     |     |      |                  |    |    |
| 4  | enhance the presentation and documentation skills in order to disseminate solution to the real world challenging problems.                            |                         |     |     |     |     |      |                  |    |    |
| The project topic should be selected to ensure the satisfaction need to establish a direct link between education, national development and productivity and reduce the gap between the world of work and the world of study.  |   |                         |     |     |     |     |      |                  |    |    |
| The student should complete the following for Phase II   |   |                         |     |     |     |     |      |                  |    |    |
| <ul style="list-style-type: none"> <li>Literature survey and formulate the problem.</li> <li>Develop preliminary design approaches.</li> <li>Implement and verify the project.</li> <li>Prepare a detailed report and presentation.</li> <li>Present findings in reputable journals and international conferences</li> </ul> |   |                         |     |     |     |     |      |                  |    |    |
| <b>TOTAL PERIODS</b>   |   |                         |     |     |     |     |      | <b>360</b>       |    |    |
| <b>COURSE OUTCOMES</b>   |   |                         |     |     |     |     |      | <b>BT MAPPED</b> |    |    |
| At the end of this course, the students will be able to  |   |                         |     |     |     |     |      | (Highest Level)  |    |    |
| <b>CO1</b>   | identify, analyze, interpret and formulate the problem and conceptualize the methodology of the project in research areas.                            |                         |     |     |     |     |      | Applying (K3)    |    |    |
| <b>CO2</b>   | create a suitable method from different methodologies and forms of analysis to produce research design.   |                         |     |     |     |     |      | Applying (K3)    |    |    |
| <b>CO3</b>   | demonstrate the developed /implemented system in the form of hardware and/or software and complement to the society.                                  |                         |     |     |     |     |      | Applying (K3)    |    |    |
| <b>CO4</b>   | present the technical findings in written report/ product and be able to present the ideas in reputed journals and/or International Conferences.      |                         |     |     |     |     |      | Applying (K3)    |    |    |
| <b>CO-PO MAPPING :</b>   |   |                         |     |     |     |     |      |                  |    |    |

| <b>COURSE OBJECTIVES</b>   |  |          |          |          |           |
| To enable the students to  |  |          |          |          |           |
| 1  | develop skills to both design and critique visualizations.       |          |          |          |           |
| 2  | introduce visual perception and core skills for visual analysis. |          |          |          |           |
| 3  | understand technological advancements of data visualization      |          |          |          |           |
| 4  | understand various data visualization techniques                 |          |          |          |           |
| 5  | understand the methodologies used to visualize large data sets   |          |          |          |           |
| <b>UNIT I</b>  | <b>INTRODUCTION OF VISUALIZATION</b>                             |          |          |          | <b>9</b>  |
| History of Data Visualization; Data Visualization Through Their Graph Representations; Graph-theoretic Graphics; High-dimensional Data Visualization; Multivariate Data Glyphs; Principles and Practice; Linked Views for Visual Exploration; Linked Data Views- Visualizing Trees and Forests.  |  |          |          |          |           |
| <b>UNIT II</b>   | <b>METHODOLOGIES</b>   |          |          |          | <b>9</b>  |
| Multidimensional Scaling; Multivariate Visualization by Density Estimation; Structured Sets of Graphs; Structural Adaptive Smoothing by Propagation; Separation Methods; Smoothing Techniques for Visualisation, Data Visualization via Kernel Machines; Visualizing Cluster Analysis and Finite Mixture Mode; Visualizing Contingency Tables ; Parallel Coordinates ; Visualization - Exploration and Classification of High ;Dimensional Data ;Matrix Visualization. |  |          |          |          |           |
| <b>UNIT III</b>  | <b>DATA TO VISUALIZATION</b>                                     |          |          |          | <b>9</b>  |
| Visualizing Data: Mapping Data onto Aesthetics; Coordinate Systems and Axes; Color Scales; Directory of Visualizations; Visualizing Amounts; Visualizing Distributions-Histograms and Density Plots; Visualizing Many Distributions at Once; Visualizing Proportions- Visualizing Nested Proportions; Visualizing Associations Among Two or More Quantitative Variables.   |  |          |          |          |           |
| <b>UNIT IV</b>   | <b>PRINCIPLES OF FIGURE DESIGN</b>                               |          |          |          | <b>9</b>  |
| The Principle of Proportional Ink; Handling Overlapping Points; Common Pitfalls of Color Use; Redundant Coding ;Multipanel Figures ;Titles, Captions, and Tables-Balance the Data and the Context  |  |          |          |          |           |
| <b>UNIT V</b>  | <b>APPLICATION IN VISUALIZATION</b>                              |          |          |          | <b>9</b>  |
| Visualization for Genetic Network Reconstruction, Reconstruction ; Visualization and Analysis of Medical Images; Exploratory Graphics of a Financial Dataset ; Graphical Data Representation in Bankruptcy Analysis ; Visualizing Functional Data with an Application- Visualization Tools for Insurance Risk Processes.   |  |          |          |          |           |
| <b>TOTAL PERIODS</b>   |  |          |          |          | <b>45</b> |

| COURSE OUTCOMES                                     |  |                                      |
|---|--|--------------------------------------|
| At the end of this course, students will be able to |  | <b>BT Mapped<br/>(Highest Level)</b> |
| CO1   | represent the objects in different dimensions.   | Understanding (k2)                   |
| CO2   | analyze and process the data for Visualization.  | Analyzing (k4)                       |
| CO3   | apply the visualization techniques in physical sciences, computer science, applied mathematics and medical sciences. | Applying (k3)                        |
| CO4   | apply the virtualization techniques for research projects  | Applying (k3)                        |
| CO5   | identify appropriate data visualization techniques given particular requirements imposed by the data.                | Understanding (k2)                   |

| 1   | understand the fundamentals and classifications of web analytics.              |          |          |                      |           |
| 2   | mastering clickstream analysis for actionable insights                         |          |          |                      |           |
| 3   | enhancing proficiency in web testing and analysis                              |          |          |                      |           |
| 4   | applying optimal solutions to identify and overcome hidden web analytics traps |          |          |                      |           |
| 5   | building a successful career in web analytics                                  |          |          |                      |           |
| <b>UNIT I</b>   | <b>INTRODUCTION</b>  |          |          |                      | <b>9</b>  |
| The Bold New World Of Web Analytics 2.0;State of the Analytics Union, State of the Industry-Rethinking Web Analytics; Meet Web Analytics 2.0, Clickstream, Multiple Outcomes Analysis, Experimentation and Testing; The Optimal Strategy for Choosing Your Web Analytics Soul Mate; The Awesome World of Clickstream Analysis: Metrics-Eight Critical Web Metrics, Bounce Rate, Exit Rate, Conversion Rate; Starting with Macro Insights        |  |          |          |                      |           |
| <b>UNIT II</b>  | <b>THE POWER OF CLICKSTREAM ANALYSIS</b>                                       |          |          |                      | <b>9</b>  |
| The Awesome World of Clickstream Analysis-A Web Analytics Primer-Fixing Stuff and Saving Money-Foundational Analytical Strategies, -Everyday Clickstream Analyses Made Actionable, Internal Site Search Analysis, Search Engine Optimization (SEO) Analysis, Direct Traffic Analysis-Measuring Macro and Micro Conversions/Examples –Surveys-Types of Surveys, Three Greatest Survey Questions Ever, Web-Enabled Emerging User Research Options |  |          |          |                      |           |
| <b>UNIT III</b>   | <b>TESTING AND ANALYSIS</b>  |          |          |                      | <b>9</b>  |
| Unleashing the Power of Testing and Experimentation-A Primer on Testing Options: A/B and MVT; Creating and Nurturing a Testing Culture; Competitive Intelligence Analysis- CI Data Sources, Types, and Secrets; Website Traffic Analysis, Search and Keyword Analysis; Emerging Analytics: Social, Mobile, and Video-Measuring the Success of Blogs; Analyzing Performance of Videos  |  |          |          |                      |           |
| <b>UNIT IV</b>  | <b>OPTIMAL SOLUTIONS FOR HIDDEN WEB ANALYTICS TRAPS</b>                        |          |          |                      | <b>9</b>  |
| A Six-Step Process for Dealing with Data Quality; Five Rules for High-Impact Dashboards; Online Data Mining and Predictive Analytics-Type of Data, Number of Variables, Multiple Primary Purposes, Missing Primary Keys and Data Sets; Comparing KPI Trends Over Time; Four In actionable KPI Measurement Techniques; Multichannel Analytics  |  |          |          |                      |           |
| <b>UNIT V</b>   | <b>THE WEB ANALYTICS CAREER</b>  |          |          |                      | <b>9</b>  |
| Planning a Web Analytics Career; Cultivating Skills for a Successful Career in Web Analysis; Changing Metric Definitions to Change Cultures; Five Rules for Creating a Data-Driven; Strategies to Break Down Barriers to Web Measurement.   |  |          |          |                      |           |
|   |  |          |          | <b>TOTAL PERIODS</b> | <b>45</b> |

| COURSE OUTCOMES                                     |  |                              |
|---|--|------------------------------|
| At the end of this course, students will be able to |  | BT Mapped<br>(Highest Level) |
| CO1   | understand the evolution to web analytics 2.0 and its significance   | Understanding (K2)           |
| CO2   | understand the foundational principles of clickstream analysis in web analytics  | Understanding (K2)           |
| CO3   | implement A/B and multivariate testing (MVT) techniques effectively to optimize outcomes.  | Applying (K3)                |
| CO4   | apply online data mining and predictive analytics techniques, considering types of data, variables, primary purposes, and handling missing primary keys. | Understanding (K2)           |
| CO5   | develop strategies to overcome barriers and challenges in web measurement.   | Applying (K3)                |

| <b>COURSE OBJECTIVES</b>  |  |                         |  |   |   |                                  |           |
| To enable the students to   |  |                         |  |   |   |                                  |           |
| 1   | transform data for analysis using graph-based and statistics-based social network measures                         |                         |  |   |   |                                  |           |
| 2   | choose among social network behavior based on research goals   |                         |  |   |   |                                  |           |
| 3   | understand the basic concepts and principles of different algorithms of social networks analysis.                  |                         |  |   |   |                                  |           |
| 4   | analyze social media data to comprehend user sentiments and recommend the essential information appropriately.     |                         |  |   |   |                                  |           |
| 5   | understand the fundamental concepts in analyzing the large-scale data models that are derived from social networks |                         |  |   |   |                                  |           |
| <b>UNIT I</b>   | <b>SOCIAL NETWORK AND GRAPH</b>  |                         |  |   |   |                                  | <b>9</b>  |
| Introduction-Important tools and analysis of online network data; Python libraries and associated packages, Execution of SNA in real time application, SNA and Graph representation; Real-time product from SNA- Indices employed in Social Network-Tools to analyze Network-Scope of python in SNA- Use Case-Real-Time product from SNA- Aspects of the network-Graph-Scale free networks-Network Data Sets. |  |                         |  |   |   |                                  |           |
| <b>UNIT II</b>  | <b>CASCADING BEHAVIOR AND PRAGMATIC ANALYSIS</b>   |                         |  |   |   |                                  | <b>9</b>  |
| Introduction; User behavior; Cascaded behavior; Social Media Analytics; Conventional strategies in Data Mining techniques; Research Gaps in the current scenario; Introduction to Pragmatic analysis; Background; Proposed model; Building Social Ontology under the agriculture Domain-Validation.   |  |                         |  |   |   |                                  |           |
| <b>UNIT III</b>   | <b>CLASSIFICATION OF ANOMALOUS ACTIVITIES AND ALGORITHMS</b>   |                         |  |   |   |                                  | <b>9</b>  |
| Introduction; Methodology; Implementation; Basis of Machine learning approach; Forecast the word in social media related works; TF-IDF Technique, Time series.  |  |                         |  |   |   |                                  |           |
| <b>UNIT IV</b>  | <b>SENTIMENT ANALYSIS AND MODELS</b>   |                         |  |   |   |                                  | <b>9</b>  |
| Sentiment Analysis; Techniques in sentiment Analysis; Implementation of sentiment Analysis and Results; Future Scope; Introduction to Cascades; Cascade Networks-Importance of Cascades; Cascade Capacity; Models of Network Cascades, Centrality, Cascading failures; Behavior example using python.   |  |                         |  |   |   |                                  |           |
| <b>UNIT V</b>   | <b>EXPLORING SOCIAL NETWORKING DATA SETS</b>   |                         |  |   |   |                                  | <b>9</b>  |
| Introduction; Establishing a Social Network; Connectivity of users in social Networks; Centrality measures in social networks; Case study of Facebook.  |  |                         |  |   |   |                                  |           |
|   |  |                         |  |   |   | <b>TOTAL PERIODS</b>             | <b>45</b> |
| <b>COURSE OUTCOMES</b>  |  |                         |  |   |   |                                  |           |
| At the end of this course, students will be able to   |  |                         |  |   |   | <b>BT Mapped (Highest Level)</b> |           |
| <b>CO1</b>  | prepare and execute network analytical computations.   |                         |  |   |   | Understanding (K2)               |           |
| <b>CO2</b>  | use social network analysis in behavior analytics  |                         |  |   |   | Analyzing (K4)                   |           |
| <b>CO3</b>  | implement mining algorithms for social networks  |                         |  |   |   | Applying (K3)                    |           |
| <b>CO4</b>  | analyze and evaluate social communities  |                         |  |   |   | Applying (K3)                    |           |

|     |  |               |
|-----|--|---------------|
| CO5 | performing on large social networks and illustrate the results | Analying (K4) |
|-----|--|---------------|
